EZYGRIND

EzyGrind is the safest and fastest way to cut PVC and HDPE pipes (sizes from 40-150mm) at or below floor level. Especially suited to concrete slab construction, and difficult to access areas. EzyGrind will produce a clean professional finish with one cutting action.

- 7mm hex shank. Fits all drill chucks
- Replaceable diamond blade
- Includes two cutting guides for controlled cutting depth, white for standard PVC and black for HDPE pipes

Suitable for pipes including: encased pipes, pipe penetrations, conduits, storm water, sewer, WC's, shower drains, floor wastes, down pipes and inspection openings.

Cuts 3 times faster than a grinder.

No grinder needed! It works by using a power drill, inserting the tool inside the pipe and cutting from the inside.

EzyGrind is the safest way to cut pipes. Using an angle grinder will cause potential safety problems. Many state governments recommend using an alternative to an angle grinder wherever possible. EzyGrind is your best choice.

1 Insert the EzyGrind into PVC pipe. Begin cutting by pushing firmly against the pipe wall until it cuts through.

2 Operate in a clockwise direction. Maintain outward pressure.

3 Keep drill parallel to the pipe for a perfect cut.

Pipe	80mm Diameter	36mm Diameter
DWW	90-150mm	40-65mm
HDPE	90-150mm	50-75mm
PVC Storm	90-150mm	-
HD PVC	100-125mm	50-80mm
